2	
were also five or six small naval vessels, old destroyers. in Kronshtadt	l
as were five submarines further on in the harbor.	2
The following vessels were observed in the	
region between Kronshtadt and the Leningrad Lightship: Small mine-	_ 2
sweepers and an MTB a minesweeper and an MTB The following vessels	
and an MTB The following vessels were in column on an easterly course about halfway between the Leningrad	¹ 2: 1 2
Lightship and Seskar Island: ADMIRAL MAKAROV	2
a destroyer a SVERDLOV-Class cruiser	2
	2:
The OKTYABRSKAYA REVOLYUTSIYA went directly across the	.2
prohibited area northwest of the Leningrad Lightship.	
the following naval vessels were observed	25 X
from a position about 15 nautical miles west of the Leningrad Lightship:	;
Toward the northwestern horizon the OKTYABRSKAYA REVOLYUTSIYA and five	
large naval vessels, probably SVERDLOV Class cruisers. A couple of	2
nautical miles north there was a smoke screen, out of which came eight identical, medium large naval vessels, probably	2
destroyers, and an undetermined number of smaller vessels. all nursuing	
a course toward Kronshtadt.	2
They were about 400 to 450 feet	2
long, with a low forecastle with a small break down at the forward	
funnel. There were two gun mounts, or possibly shields which were	
open to the rear, on the foredeck, with two guns in each. The bridge had something large and round on top; range finders extended out to the	
side at the top of the large round thing and at the very top there was	
a small radar scanner. A tripod mast with several antennas stood close	
abaft the bridge. The forward funnel, which was equipped with a smoke	
deflector and was raked, was situated just abaft the mast. An object.	
possibly a torpedo mount, was situated between the funnels. The after	
funnel was similar to the forward one but the smoke deflector sloped toward the bow. The mainmast was also of tripod construction, larger	
than the foremast, and had a large radar scanner at the truck. One,	
possibly two, gun mounts were on the afterdeck. Around the after funnel	
there were quadruple-mounted antiaircraft guns, and abaft the aftermast	
there was a quintuple-mounted antiaircraft gun. (See Sketch No. 1)	,
The smaller vessels had two funnels, drop slides on the afterdeck, and	25
transom sterns. there were four identical submarines in the channel between Kronshtadt and the Morskoy Canal. They were	, 25>
apparently new, and uncompleted. They had streamlined conning towers.	
No guns were visible either on deck or in the conning towers.	
	25>
vessels of the same class as the destroyers described above, and as	
shown on Sketch No. 1, were observed along the quay at the Zhdanov	
Shipward in Leningrad. All appeared to be completed.	25>
an unfinished vessel of the same class was towed from the	25/
Zhdanov Shipyard into the Morskoy Canal. This vessel had no armament.	
two transport vessels,	25>
together with a large and a medium large naval vessel, lay at anchor	
just outside the moles at Kronshtadt. One transport vessel was painted	_
grav and had two funnels. The other	2: 2:
and had a small gun mount on the forward edge of the bridge, and one funnel. The combatant vessels were the cruiser ADMIRAL MAKAROV	2
	25
one funnel. six medium large	25 X

	2

S-E-C-R-E-T 25X1 NOFORN/CONTINUED CONTROL 25X1 naval vessels were in the harbor at Kronshtadt. Two with two funnels, each with a mast 25X1 at the forward edge. The four vessels lying behind them were probably of the same class. The OKTYABRSKAYA REVOLYUTSIYA lay moored to buoys between Kronshtadt and the Leningrad Lightship. The guns in the casemates had been removed. The pilot said that the old battleship was to be scrapped next year. 25X1 25X1 6. the ADMIRAL MAKAROV and three medium large naval vessels were near Narvi Light. 25X1 vessels sailed on varying courses in symmetrical formation, and were engaged in laying down smoke screens. A vessel 25X1 25X1 lay moored The former was a flushdecker, with two funnels between which there were two torpedo mounts. 25X1 On the same day four naval vessels lay nested along the quay at the 25X1 Zhdanov Shipyard. a flushdecker with two funnels and two masts. There was a large grill scanner with a conical construction abaft the top of the mainmast. The three vessels between this vessel and the quay were probably of the same class. Two newly constructed naval vessels lay along the north quay of the Marti Shipyard. The vessel nearest the bridge on Gaza Avenue had a high superstructure. The mast had not been erected and probably not the funnels either. Everything on the vessel which was visible over the fence was red-leaded. 25X1 7. a very large naval vessel entered and anchored just inside Kronshtadt. It was escorted by an undetermined number of smaller vessels, of which some anchored and some turned and went back in the direction of the Leningrad Lightship. 25X1 It had a very large, broad, 25X1 weather bow, with three superimposed gun turrets on the foredeck. There were probably three guns in the two upper turrets and four guns in the lower one. There was a radar scanner on each gun turret. The vessel had four not quite identical, perpendicular funnels. The pilot referred to the vessel as "battleship" and "the chief's ship." All other vessels saluted this vessel. 8. At the northern end of Zhdanov Shipyard there was a colossal stationary crane setup, consisting of large portal crane the upper construction of which was especially substantial. Several crabs of various sizes travelled lengthwise of the crane. There was open water under the crane portal but no locks. One of the destroyers described above was observed inside the base underneath the crane. An object resembling a torpedo was hoisted aboard. 9. The quay on the north side of Khlebnyy-Lesnoy mole was designated No. 76. There were 10 mobile 15-ton cranes along the edge of the quay. Behind these was a larger number of 5-ton cranes. A ferry went into the city from the western end of the quay on Khlebnyy-Lesnoy mole. Travel on the ferry was gratis. Everyone who attempted to go into the city via land was stopped. 10. Bredging operations were in progress in the navigation channel inside

S-E-C-R-E-T

floating crane was observed.

Kronshtadt. It was said that one time in the latter part of June the scoops of the dredging apparatus had picked up two mines and the port was closed for five or six days. Two apparently new floating cranes, both rated at 100 tons, were seen in the port. A 50-ton and a 25-ton

		25 X
L.	a submarine and three destroyers accompanied by a large naval vessel were three or four nautical miles	207
	east of Sommats. All the vessels were headed towards Sommats and were	
	sailing at unequal distances from each other, apparently not in any	
	formation. The destroyers, which were farthest away	2
	were carrying on gunnery and smoke screen laying exercises. The	25 25
	submarine had a large conning tower. The destroyers were alike, they each had two funnels and two masts.	_`
	The large naval vessel resembled the	2
	ADMIRAL MAKAROV. the vessel	252
	ADMIRAL MAKAROV, lay at anchor near the Leningrad Lightship. a destroyer and an undetermined number of	25
	submarines were between the Leningrad Lightship and Kronshtadt pro-	25)
	ceeding toward the lightship. The destroyer	
	was a flushdecker with one gun mount on the foredeck, a bridge with	25
	mast at the after edge, a sphere-shaped object on the mast, one funnel just abaft the mast, one torpedo mount with three tubes on the	20
	centerline forward of the funnel and one torpedo mount with three tubes	
	on the centerline abaft the funnel, the mainmast and one gun mount on	
	the afterdeck. (See Sketch No. 2) At 1700 hours GMT a submarine with	
	pennant number 41 was on a northeasterly course north of Takona Light.	
	a special purpose vessel was at	25>
	anchor outside Kronshtadt.	2
	hulls, each provided with a screw and a rudder, and four tall steel arches from hull to hull. The command bridge was atop the forward	
	arch. (See Sketch No. 3)	
	· <u>·</u>	25)
	a medium large naval vessel was moored in buoys due west of the Leningrad Lightship. It	
	was about 350 to 400 feet long, and had flush decks with a	2 2
	marked sheer in the foredeck. It had two gun mounts on the foredeck	
	with one or two guns in each. The bridge had two structures at the	
	top, neither of which had a distinct spherical shape. There was a tripod mast at the after edge of the bridge, a radar scanner atop the	
	mast, and much other antenna equipment. The forward funnel was	
	immediately abaft the mast. There were two torpedo mounts on each side	
	abaft the funnel, but the number of tubes was not observed. The main-	
	mast was the same height as the foremast, and also had antennas. A structure like one of the two on the bridge projected upward between	
	the mainmast and the after funnel. The after funnel was identical with	
	the forward one. There were two torpedo mounts on each side sheft the	٥٢١
	after funnel, and two gun mounts on the afterdeck with one or two guns	25)
